BUILD + PROTECT COLLAGEN

Palmitoyl Tripeptide-5

DSM patented ingredient

A synthetic, fatty acid-bound peptide works by mimicking the body's natural messengers to stimulate fibroblasts, resulting in firmer, smoother and more elastic skin.

Dual Action

Promotes collagen production AND
inhibits collagen degradation simultaneously

*84-day clinical trial: visible reduction in wrinkle
depth / visible pore reduction at 4 weeks*

"Dual action — builds collagen and protects it"

Biotin Peptide

Hexapeptide-2 + Biotin — Patented ingredient — 500µg, 2% concentration

The combination of Biotin (Vitamin B7) with a chain of amino acids (peptides) will enhance structural strength and improve skin elasticity.

Collagen increase

Dermal-Epidermal Junction (DEJ) reinforcement
